2022 Interim Management Report
of Fund Performance

Brandes Corporate Focus Bond Fund

BRANDES CORPORATE FOCUS BOND FUND

This interim management report of fund performance contains financial highlights but does not contain the complete interim or annual financial statements of the Fund. The interim or annual financial statements are in a separate booklet. You may obtain a copy of the interim or annual financial statements at your request, and at no cost, by calling toll-free 1.888.861.9998, by writing to us at Bridgehouse Asset Managers, 36 Toronto Street, Suite 850, Toronto, ON, M5C 2C5, or by visiting our website: www.bridgehousecanada.com or the SEDAR website: www.sedar.com.

You may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Fund.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Results of Operations from January 1, 2022 to June 30, 2022

Markets & Effect

The first half of 2022 has seen very weak performance for bond markets. If losses that were experienced in the first half of 2022 are maintained moving forward, this could have the potential to be the worst year for U.S. government bond performance in decades.

The first quarter of the year began with a sharp repricing of fixed income markets, and investors as well as the Federal Reserve (the Fed) were forced to act fast. During the first quarter of the year, instead of a slow and methodical winding down of the COVID-19 monetary policy response, the Fed began to raise interest rates at a rapid pace to combat inflation numbers that were reminiscent of the 1970s.

Starting in early 2021, the U.S. market was pricing in growth from an economy that was accelerating a reopening phase following unprecedented accommodative monetary policy and continued fiscal stimulus from the federal government. Now in 2022, the ongoing pandemic and Russia's invasion of Ukraine has added to market turbulence.

The Fed was labelling rising inflation as a transitory period until late 2021. It appears that policy changes were not enacted fast enough, and it has become a larger issue than a transition. As a result, controlling inflation with interest rate policy while simultaneously avoiding a crash landing for the overall economy, has become more difficult and could lead to continued market volatility.

Markets now appear to be exiting the period where valuations were being artificially propped up by injections of liquidity by the Federal Reserve and quantitative easing from the federal government. This transition has been painful for virtually every asset class over the short-term.

In Brandes' view, over the last few years, fundamentals like stable cash flow generation, margins, and balance sheet strength have taken a back seat to speculative factors like momentum. Brandes believes that in the longer-term, a market where fundamentals drive valuations is both a healthier market and one where managers focused on

finding value through security selection have great potential to achieve positive portfolio performance.

Performance

The Fund's Unhedged Series A units trailed its benchmark, losing 7.8% versus a loss of 6.6% for the Bloomberg Barclays U.S. Intermediate Credit Index (the "Index"). The Fund's Hedged Series A units also trailed its benchmark, losing 9.4% versus a loss of 8.6% for the Bloomberg Barclays U.S. Intermediate Credit Index (Hedged) (the "Index").

The Fund returns are after the deduction of fees and expenses while the benchmark returns do not include any costs of investing. See the "Past Performance" section for the returns of the other series, which may vary because of differences in management fees and expenses or timing of series introduction.

Asset Mix

At June 30, 2022, the Fund consisted of 40.5% in U.S. Dollar denominated government fixed income securities, 59.0% in U.S. Dollar denominated corporate fixed income securities, and approximately 0.5% in cash and other net assets.

The securities holdings in the Fund had an average credit rating of A2 by Moody's at June 30, 2022, unchanged from December 31, 2021. The Fund's duration increased to 3.66 years at June 30, 2022 from 3.52 years at December 31, 2021.

In line with its "bottom-up" investment philosophy, Brandes LP continues to build the portfolio on a security-by-security basis, as opposed to top-down.

Typically less than 5% of the Fund is allocated to any one security, at the time of purchase. Therefore, the addition or deletion of an individual security will generally not constitute a substantial change to the portfolio.

The Manager confirms that the Fund did not borrow money during the period.

Flows & Fees

The Fund's Net Asset Value decreased to \$44.5 million at June 30, 2022, from \$54.3 at December 31, 2021. Of this change, a decrease of \$4.4 million was due to negative investment performance (net of investment income), and a decrease of \$5.4 million was due to net outflows.

For Series A units, the annualized management expense ratio ("MER") at June 30, 2022 is 1.52%, compared to 1.53% at December 31, 2021, for the Unhedged series. The annualized MER for the Hedged series is 1.57% at June 30, 2022, compared to 1.58% at December 31, 2021.

Recent Developments

There are no known changes at this time to the strategic positioning of the Fund, the manager, or portfolio sub-advisor.

As noted in the simplified prospectus, this Fund is subject to large transaction risk because it has security holders who individually own more than 10% of the Fund. In order to reduce the impact of this risk to security holders, Bridgehouse asks, but does not require, large investors to provide notice when significant redemptions are being contemplated.

The invasion of Ukraine by Russia on February 24, 2022 has resulted in western economic sanctions being imposed on Russia, notably barring Russian banks from the SWIFT financial messaging system, a key piece of banking infrastructure. In response to sanctions, Russian markets have been closed to all foreign investors. This has caused material volatility in Russian financial markets and impacted liquidity, market access and reliability of security prices. In addition, export embargoes may lead to increased volatility in commodity prices and global supply chain disruptions. It is uncertain how long the conflict, economic sanctions and market instability will continue and whether they will escalate further. The Fund manager and portfolio sub-advisor(s) continue to actively monitor the situation for any impacts on the Fund's existing as well as potential new holdings.

Effective April 22, 2022, Bridgehouse no longer pays trailing commissions to dealers that do not make a suitability determination, such as order-execution-only ("OEO") dealers, in accordance with the Canadian Securities Administrators' decision to end the payment of trailing commissions to OEO dealers that came into effect on June 1, 2022. Accounts held at OEO dealers are only permitted to purchase or hold securities of Series F of the Fund, which does not pay a trailing commission.

On April 22, 2022, all Series A units of the Fund held in accounts at OEO dealers were switched into Series F at no cost to the unitholder and without a disposition for tax purposes.

The outbreak of the novel coronavirus, first detected in December 2019, rapidly became a pandemic and resulted in disruptions to the economies of many nations, individual companies and the markets in general. This created closed borders, quarantines, supply chain disruptions and general anxiety, which negatively impacted global markets in an unforeseeable manner. The impact of the novel coronavirus and other such future infectious diseases in certain regions or countries may be greater or less due to the nature or level of their public health responses or due to other factors. Health crises caused by the coronavirus outbreak or future infectious diseases may exacerbate other pre-existing political, social and economic risks in certain countries. The impact of such health crises may be quick, severe and of unknowable duration. This pandemic and other epidemics and pandemics that may arise in the future could result in continued volatility in the financial markets and lead to increased levels of Fund redemptions, which could have a negative impact on the Funds and could adversely affect a Fund's performance.

Related Party Transactions

Manager and Portfolio Sub-Advisor

The Fund is managed and advised by Brandes Investment Partners & Co., operating as Bridgehouse Asset Managers ("Bridgehouse") which provides (or arranges for) investment management, distribution, marketing and promotion of the Fund. Bridgehouse receives a monthly management fee based on the daily average net assets of each series of the Fund. In addition, Bridgehouse is entitled to be reimbursed by the Fund for certain operating expenses.

Brandes Investment Partners L.P. ("Brandes LP") continued to be the Manager's portfolio sub-advisor in respect of the Fund. Bridgehouse pays Brandes LP an investment management fee to provide the Fund with investment management services. Bridgehouse and Brandes LP are affiliates.

Forward-Looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, performance, decisions, circumstances, opportunities, risks or other matters. Forward-looking statements are statements that are predictive in nature, depend upon or refer to future events or conditions, or that include words such as "may", "will", "should", "could", "expect", "anticipate", "intend", "plan", "believe", or "estimate" or other similar expressions. These statements require us to make assumptions and are subject to inherent risks and uncertainties. Our predictions and other forward-looking statements may not prove to be accurate, or a number of factors could cause actual events, results, performance, etc. to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors could include, among others, market and general economic

conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Fund may invest, and the risks detailed from time to time in the Fund's simplified prospectus. Forward-looking statements are not guarantees of future performance. For these reasons, it is important that readers do not place undue reliance on our forward-looking statements and should be aware that the Fund may not update any forward-looking statements whether as a result of new information, future events or otherwise.

Benchmark Indices

Bloomberg U.S. Intermediate Credit Index: This index measures the performance of investment grade corporate bonds in the United States with maturities of between one and ten years.

Bloomberg U.S. Intermediate Credit Index (Hedged): This index measures the performance of investment grade corporate bonds in the United States with maturities of between one and ten years. The hedged version minimizes the exposure of currency fluctuations on index performance.

FINANCIAL HIGHLIGHTS

FOR THE SIX MONTHS ENDED JUNE 30, 2022 AND PERIODS ENDED DECEMBER 31, 2017 TO 2021

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended June 30, 2022 and for the past five periods ended December 31, as applicable. In the year a fund or series is established, 'period' represents inception to December 31 of that year. In all other cases, 'period' represents year ended December 31.

The Fund's Net Assets per Unit (\$) (note 1)

- The financial information presented in the Net Assets per Unit table is derived from the Fund's audited financial statements.
- Net Assets and distributions are per Unit of a series are based on the actual number of units outstanding for that series at the relevant time. The Increase (Decrease) from Operations per Unit of a series is based on the weighted average number of units outstanding for that series during the financial period.
- Distributions per Unit of a series are based on the number of units outstanding for the series on the record dates for the distributions. Distributions were paid in cash/reinvested in additional units of the Fund or both.

- The financial information presented in the Ratios and Supplemental Data table is derived from the Fund's Net Asset Value and is provided as at December 31 of the years shown.
- The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including GST/HST and interest and excluding commissions and other portfolio transaction costs, and is expressed as a percentage of the average daily Net Asset Value of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorptions can be terminated at any time. The MERs of the Fund are shown both with and without the waiver and absorptions.
- Portfolio turnover rate is calculated at the Fund level based on the lesser of purchases or proceeds of sales of securities for the period, excluding cash, short term notes and bonds having maturity dates at acquisition of one year or less, divided by the average value of the portfolio securities for the period. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Value of the Fund. The trading expense ratio is calculated at the Fund level and applies to all series of the Fund.

MANAGEMENT FEES

Bridgehouse Asset Managers, the Manager, provides or arranges for investment management, distribution, marketing and promotion of the Fund. In consideration for the services provided, Bridgehouse Asset Managers receives a monthly management fee based on the daily average Net Asset Value of Series A, Series F, Series AH and Series FH. Management fees for Series I and Series IH are negotiated and paid directly by the unitholders of Series I and Series IH, not by the Fund.

For the six months period ended June 30, 2022, the Fund paid Bridgehouse Asset Managers management fees of \$136,531. Bridgehouse uses these management fees to pay for commission payments to registered brokers and dealers and general investment management expenses. The breakdown (commission payments / investment management, administration and other) as a proportion of the management fee for each Series are:

- Series A, AH (40% / 60%)
- Series F, FH (0% / 100%)
- Series I, IH (0% / 100%)

Commission payments represent cash commissions paid by Bridgehouse Asset Managers to registered brokers and dealers during the period and includes upfront deferred sales charge and trailing commissions. This amount may, in certain circumstances, exceed 100% of the fees earned by the Bridgehouse Asset Managers during the period. For new Funds or Series the amount presented may not be indicative of longer term operating periods.

PAST PERFORMANCE

This section shows the historical performance for each series of the Fund for the six months ended June 30, 2022 and each of the previous annual periods ended December 31. Historical performance is based on the change in Net Asset Value per unit, assuming reinvestment of all distributions. Management fees and operating expenses have been taken into account before calculating performance, except in the case of Series I and Series IH units where the management fee is calculated outside of the Fund. Historical performance does not take into account the potential impact on returns of purchases, redemptions, distribution fees or other optional charges or income taxes payable by an investor. Keep in mind that past performance does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns (%)

The bar chart shows the Fund's annual performance for each of the years shown. The bar chart shows how the performance of each series of the Fund has changed from year to year. It illustrates in percentage terms how much an investment in each series of the Fund made on January 1 of each year, or on the inception dates, would have grown or decreased by the last day of each financial year. 2022 data presented below is for the six-month period ended June 30, 2022.
